## Press Release

**ELESYS North America Inc., has achieved the prestigious ISO 14001:2004 accreditation, illustrating their current and future commitment to minimizing environmental impact.**

**SUWANEE, Georgia, February 25, 2009** –ELESYS North America Inc., automotive electronic safety systems, has achieved the ISO 14001:2004 Environmental Management System Certification. The [ISO 14001:2004](http://www.iso.org) international standard provides both a model for streamlining environmental management and guidelines to ensure environmental issues are considered within decision making practices. ELESYS manufactures its highly competitive automotive electronic safety systems products at its headquarters in Suwanee, Georgia.

ELESYS' automotive electronic safety systems are featured in a variety of vehicle models, including SUVs and passenger cars, for several vehicle manufacturers in North America. With a 5-Star crash rating given to several vehicles equipped with its automotive electronic safety systems millions of drivers can rely on ELESYS' passive and active safety systems: Occupant Sensing System (SeatSentry™), Passenger Sensing Systems, Occupant Passenger Detection System, Airbag Sensors and Controllers, Adaptive Cruise Control, All-Terrain Vehicle Transmission Controls, Anti-Lock Brakes, Electronic Power Steering, Traction Control System, and Vehicle Stability Controls. ELESYS has proven it delivers a high standard of quality.

"Elesys is extremely proud of the awards and recognition we have received for our efforts to preserve the environment, protect our employee's and public's safety. Over the last year Elesys has taken steps to minimize the amount of waste we send to our landfill, recycle as much as we can, and to conserve energy as a way to preserve our environment", says Chuck Parker, Environmental, Health, and Safety Engineer for Elesys. "Future initiatives include reducing energy consumption, further increasing recycling and improving associate's environmental awareness. These will offer additional benefits as well as an even greater reduction of our environmental impact," says Matt Williams, Senior Manager of Supply Chain Management & Manufacturing. For more information about Elesys' environmental management system visit our website at <http://www.elesys-na.com>.

### About ELESYS

Headquartered in Suwanee, Georgia with an Ohio Technical Center in Dublin, Ohio, ELESYS ([www.elesys-na.com](http://www.elesys-na.com)) is a global business leader with a history of providing automotive safety electronics on which consumers have depended for the last decade. Products include both passive and active safety systems: Occupant Sensing System (SeatSentry™), Passenger Sensing Systems, Occupant Passenger Detection System, Airbag Sensors and Controllers, Adaptive Cruise Control, All-Terrain Vehicle Transmission Controls, Anti-Lock Brakes, Electronic Power Steering, Traction Control System, and Vehicle Stability Controls.
